

Spa Back Area Refresh

Before

After

Project Overview

The spa's back relaxation area originally featured heavy seating and limited natural flow, making it feel less inviting and disconnected from the spa's serene identity.

Through a refresh with lighter furnishings, soft neutral palettes, natural fabrics, and carefully layered greenery, the area was transformed into a calm retreat. Sheer curtains, warm lighting, and clean-lined furniture created an open, airy environment that encourages relaxation. This design reflects a balance of simplicity and elegance, enhancing the guest journey and aligning the space with five-star spa expectations.
